

LAN Trainer System

Specification

LAN Trainer system has an integrated hardware flow control, on panel board for better understanding of different types of LAN topologies,. It is provided with toolkit & various Connectors, cables & accessories to teach handing of network & connectorization

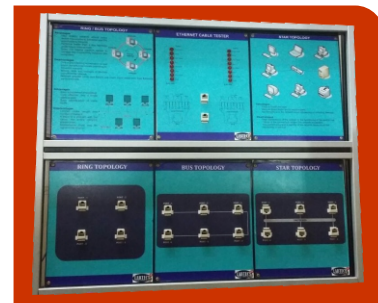

Hardware Specification:

Panel for Bus Star & Ring Topologies , thru separate connectors.Hardwired panel with clear technology terms
Facility for Wireless LAN with access Point
Toolkit for connectorization
RJ45 connectors & CAT 5 Cables
Data rate up to 100 Mbps 3 LAN Hub's for different 2 protocol study (Star, Bus, Ring)
Metal with front panel for study separate -2
220 v AC input supply
Lan wires & RJ45 connector.

Software:

Training software for the conceptual study of various topologies

- Real time graphical representation of entire transmission & reception.
- Facility for making connections thru various topologies and study the data transfer.
- Auto detection of IP addresses & mane of each node in the transmission.
- Built in network analysis.
- Manual and auto error generation modules.
- Built in help etc.
